Superstar Dream Colours

Superstar Dream Colours

Superstar Dream Colours are the newest pride in the Superstar Aqua Face- and Bodypaint range. The Dream Colours are made of a very user friendly water-based paint, Superstar Aqua Face- and Bodypaint, of high quality that meets the strict rules of the European Cosmetics Directive (1223/2009/EG). The colours are very beautiful and bright, the paint easy to work with and is also easy to remove. A thin layer of Superstar paint is enough to provide a nice covering base. The paint dries quickly and will not stain.

How to start

Work hygienically. Meaning: with clean hands, clean water, clean materials, and a clean workplace. Make sure you always have enough water available while painting. Use a bin to dispose of paper towels and cotton buds. Work on a clean model; you may ask the parents to clean snotty noses before you start painting. We advise to only use clean water to clean your necessities and materials, without the additives of soap, chlorine, or alcohol. Chlorine tablets can cause severe skin irritations.

How to use

Superstar Aqua Face- and Bodypaint can be applied to the skin with the use of a brush or sponge. Our paints are solid materials and need to be activated with water before you can apply them to the skin. You need little water to activate the paint. The metallic colours are made of a softer material and therefore need even less water to activate the paint.

Superstar Dream Colours can be applied to the skin with a sponge. The *Superstar Butterfly Sponge product code: 139-10.1* has the ideal shape to create, for example, a butterfly, eye-design or princess. The *Superstar Eco Sponge product code: 139-10.3* is easy-to-use when cut in half through the length with a sharp pair of scissors. Perfect for creating a base for a tiger, dragon etc. The *Foam Dauber product code: 139-21511* is perfect to create a round shape like a balloon.

Use of a sponge:

- Dampen the sponge with clean water and possibly wet the paint a little by spraying it with a spray bottle filled with clean water.
- Next wipe the sponge carefully over the paint, since the paint is fairly soft it is best to move the sponge back and forth, so you don't push the paint too much to one side of the container.
- Try to apply pressure evenly to make sure that the sponge absorbs all the colours.
- Apply the paint whilst dabbing the sponge on to the skin and you will get an amazing effect immediately, with the beautiful colours fading into each other.
- When you want to re-apply the paint onto the sponge, make sure the sponge is placed on the paint in the exact same way as the first time to prevent the colours from fading into each other unintentionally.

How to remove

Do not use pre-packaged wet wipes, baby wipes, etc. Do not use paint- or make-up remover which contains wax and/or oils. This will cause the paint to affix to the skin. Do not rub or scrub, this will cause the paint to penetrate into the skin.

The Superstar Make up Eraser black is perfect for the removal of the face- and bodypaint. Wet the wipe with water and possibly with some soft soap. Wipe the Superstar Make up Eraser black softly over the with paint covered skin to remove the paint. Product code: 139-21720. If there is still a haze of colour on the skin it can be removed with a cotton pad and some skin-oil.

Cleaning up the materials

It is of high importance to abide by the hygiene regulations found below, for your own safety and the preservation of the paint.

Superstar Dream Colours are made of Superstar Aqua Face- and Bodypaint which is a “dry matter”, which means bacteria, yeasts, moulds, and viruses cannot reproduce in our paints. However, adding too much water, or improper cleaning, may cause these to develop.

After use, wipe the Superstar Dream Colours with a clean sponge soaked in clean water. Squeeze the sponge to release the water prior to use. Use a clean (new) sponge for each individual colour. Allow for a few hours to air dry, and only place the lid if the paint has dried completely. Store in a cool and dry place.

The sponges may be reused. Wash them with clean water and soap and allow to air dry completely. Alternatively, you may wash them in a washing machine (in a washing bag or pillowcase) at a temperature of at least 60°C. The sponges can also be used as disposables.

Product safety

The entire production process of the Superstar Dream Colours takes place in Oosterhout, the Netherlands, and meets strict requirements set by the European Cosmetics Directive (1223/2009/EG). Furthermore, all Aqua Face- and Bodypaint is produced in accordance to the GMP, NEN EN ISO 22716. We are also affiliated with the NCV “Nederlandse Cosmetica Vereniging” (Dutch Cosmetics Union).
